

## Correction No. 2 made to the List of Medications

An Act respecting prescription drug insurance  
(chapter A-29.01, s. 60 para. 7 and para. 60.2)

The Régie de l'assurance maladie du Québec (the Régie) has been informed by the manufacturer Apotex of the reduction in the price of a medication. Consequently, in accordance with section 60.2 of the Act respecting prescription drug insurance, the Régie has made the necessary corrections to the List of Medications attached to the Regulation respecting the List of medications covered by the basic prescription drug insurance plan published on 16 August 2017 on the website of the Régie, with effect from 18 August 2017.

These corrections concern the reduction in the price of the following medication, for which it is necessary to correct the package size cost and unit price as follows:

| Code     | Brand name                          | Manufacturer | Package size | Cost of package size indicated | Corrected cost of package size | Unit price indicated | Corrected unit price |
|----------|-------------------------------------|--------------|--------------|--------------------------------|--------------------------------|----------------------|----------------------|
| 02452006 | Apo-<br>Emtricitabine-<br>Tenofovir | Apotex       | 30           | 657.32                         | 438.21                         | 21.9107              | 14.6070              |

These corrections have been made pursuant to the regulatory undertaking of manufacturer to submit to the Québec Minister of Health and Social Services a selling price not exceeding the selling price consented under other provincial drug insurance programs for the same medication (best price in Canada).

These corrections have effect from 18 August 2017.

Publication of these corrections on the website of the Régie imparts authentic value to them, in accordance with the last paragraph of section 60 of the Act respecting prescription drug insurance.

Québec, 15 August 2017
